

Long version

An entrepreneur and strategic advisor, Sanaz Abravani brings a systems-thinking approach and a heart-centered vision to humanity's exponential transformation. With academic credentials in Economics, Business Administration, Immigration Law, Artificial Intelligence, and International Business Law (LL.M.), she bridges legal, economic, and technological frameworks to champion ethical innovation and human sovereignty in a rapidly evolving world.

For over fifteen years, Sanaz has been a trusted consultant in global citizenship and international mobility, advising high-net-worth individuals, economic funds, and immigration ministries on residency, investment migration, and sustainable development strategies. Her work has played a key role in shaping future-ready ecosystems that attract global talent while fostering long-term economic resilience.

As Executive Director of The Multiplanetary Society and CEO of Abravera Ventures, she continues to guide purpose-driven ventures, focusing on human-first implementation of singularity technologies.

Her commitment to human flourishing extends into real estate development, where she partners with her mother on projects in the U.S. and Dubai, creating regenerative communities and wellness-focused spaces. These living laboratories for sustainable community building merge her expertise in global mobility, conscious development, and future-ready infrastructure.

Sanaz is also a documentary film producer, using storytelling as a powerful tool to explore digital rights, longevity science, and the intersection of technology and human sovereignty. Through film, she aims to catalyze global conversations on the ethical and societal implications of exponential technologies.

An Iranian millennial raised across Dubai, Toronto, and California, Sanaz's multicultural journey has shaped her into a natural bridge-builder between cultural frontiers, informing her approach to conscious transformation in this era of unprecedented change.

Short version

Sanaz Abravani is an entrepreneur, strategic advisor, and documentary producer dedicated to ethical innovation and human sovereignty in an era of exponential transformation. With academic credentials in Economics, Business Administration, Immigration Law, Artificial Intelligence (Oxford University), and International Business Law (LL.M.), she has spent over fifteen years advising high-net-worth individuals, economic funds, and immigration ministries on global citizenship, investment migration, and sustainable development. As Executive Director of The Multiplanetary Society and CEO of Abravera Ventures, she champions human-first implementation of singularity technologies while developing regenerative communities in the U.S. and Dubai alongside her mother. Through documentary filmmaking, she explores digital

rights, longevity science, and the intersection of technology and human sovereignty, bridging consciousness with technological advancement. Raised across Dubai, Toronto, and California, Sanaz is a natural bridge-builder between cultural and technological frontiers, shaping future-ready ecosystems for global transformation.
